---

Got the invite — accepted. Thanks for the one-pager; the three outcomes are exactly the kind of framing that makes scoping easier.

One small ask before Friday: could you let me know which OpenShift edition you've been benchmarked against (Container Platform vs. Platform Plus)? It changes which day-2 tools we'd build into the SoW — specifically Advanced Cluster Management and Quay. Not a blocker for the call, but it lets us spend our 45 minutes on architecture rather than SKU questions.
