Raj,

Recap is accurate. I'm targeting Wednesday for the SoW draft — Marcus and our consultant David Okonkwo are working through sizing and the day-2 split with our delivery practice this week.

On the Q2 deadline: doable, but tight. The two-week install assumes your network team has the VLANs and DNS records ready when we land on site. If those slip, the install slips, and we eat the buffer fast. I'll add that as an assumption on the SoW — flag it now so it doesn't feel like a surprise when you read it.

On training: hear you. I'll put together a real curriculum, not a catalog dump. Probably DO180 + DO288 as the spine, with a couple of instructor-led workshops tailored to your CI pipeline.
