All fair. Revising:

1. Replacing the training block with a concrete package — three instructor-led DO180 cohorts (back-to-back, two days each), one DO288 cohort for your senior folks, and two half-day workshops we'll build around your CI pipeline. Cert vouchers included for anyone who wants to take the EX180 / EX288 exams. I'll spell out hours and deliverables in 5.3.
2. Day-2 handoff moved to day 45. We'll keep the weekly cadence through day 90. Past 90 it's a separate conversation, ideally a Premium Support renewal rather than ad-hoc consulting.
3. Inlining the acceptance criteria in 4.2 — about a page of bullet points. No open references.

Revised SoW will be in your inbox tomorrow morning.
