Priya — quick one before the team finishes the pre-read.

On day-2 ops: when the SoW says 'Red Hat owns operations through day 45,' I want to make sure we agree on what 'owns' means. Specifically: if we have a Sev-1 at 2 AM on day 20, who picks up the phone? Is that your consulting team on a pager rotation, or do we need to be on Premium Support already?

Asking because Elena will ask, and I'd rather have a real answer than 'we'll figure it out.'
